

1                   80.    The locking device of claim 77 wherein said locking arm rotates between said locked  
2                   position and said unlocked position.

1                   81.    The locking device of claim 77 wherein said rotation is about an axis perpendicular to  
2                   a plane containing the security slot.

1                   82.    The locking device of claim 77 wherein said disengagement position matches said  
2                   unlocked position.

1                   83.    (Previously CANCELED)

#### CONCLUSION

In view of the foregoing amendment to the independent claims, Applicants believe all claims now pending in this Application are in condition for allowance. The amendments are respectfully asserted to moot the rejections. None of the references teach nor suggest that the locking arm move relative to the housing when moving between the locked and unlocked position of the locking arm. The issuance of a formal Notice of Allowance at an early date is respectfully requested.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-393-2000.

The Assistant Commissioner of Patents is hereby authorized to charge any fees due to Deposit Account **50-1193**.
